Project Structure

Information architecture

The website will be five pages to provide all sort of related information but the main focus will be google map and its functionality.

1. Main page with all information about Bamyan.
2. History page to show the age and history of the place.
3. Guide page to provide names and short historical information about the place.
4. Hotel page to show information about hotels and possibility of using google map to provide the specific address.
5. Contact page to show possibility of contacting by mail or any other sort of contact option.

As it shows bellow
